Data Centres**

Asset Management Policy

Council unanimously approved the revised Asset Management Policy, which establishes a governance framework for the systematic management of municipal assets throughout their lifecycle, including roads, water and wastewater infrastructure, facilities, fleet vehicles, and other physical assets.

Land Use Bylaw Amendment - Accessory Building Driveway Setback

Council gave first reading to a proposed Land Use Bylaw Amendment which will update the minimum setback required for an Accessory Building accessed by a lane (e.g. rear detached garage) to 1m from the rear property line (currently required to be setback either 1m or 6m)

With the approval of the first reading, there will be a public hearing held on October 13 with the purpose of receiving comments before the amendment moves for final approval.

Letter of Support - Optimist Club of Blackfalds

Council approved moving forward with the Optimist Club of Blackfalds' request for an updated letter of support for the proposed toddler playground at Prairie Ridge Park. The letter is meant to reaffirm Council's support for the project and recognize the community benefits associated with creating a dedicated recreational space for toddlers and young families within Blackfalds.

Notice of Motion - Request for Information on Data Centres

Councillor Cory Twerdoclib presented a request for information, directing Administration to conduct research on AI Data Centers, their effects on the municipality and environment, potential changes required to the Land Use Bylaw, the MDP and any other master plans of the Town, in order to protect the interests of Blackfalds and its residents.
